

Table S5 Establishment for standard curve

Concentration of 5' frag (pg/ul)	$-\log(C,2)$	Cq_{standard}
1000	-9.965784285	10.82
100	-6.64385619	15.26
10	-3.321928095	19.37
1	0	23.15
0.1	3.321928095	27.44

**Calculation for the content of 5'****frag packaged in biosome****samples**

$$C_{\text{sample}} = 2^{(18.826 - 0.8071Cq_{\text{sample}})}$$

Notes

C refers to the concentration of 5' frag DNA standard; Cq_{standard}

refers to the Cq of 5' frag DNA

standard samples;

C_{sample} refers to the content of 5' frag RNA packaged in biosome samples; Cq_{sample} refers to the Cq of the 5' frag RNA packaged in biosome samples
